BLOOMFIELD,

selves. It has been estimated that it would Scientific. require a vessel like the Great Eastern to A Breek Launca WITH A NOVEL ENGINE. carry all the people claiming to have been -A steam launch, called the General W. on Fulton's first steamboat when it made B. Franklin, was recently tested at Rama- its trial trip. We have ourself shaken po, N. J. It was built to illustrate the hands with twenty eight men, each one of working of the Colt disk engine, the inven- whom boasted that he was the first man to tion of R. D. West; and the results ob- walk across the Nisgara suspension bridge: tained are reported as very promising. The The woods are full of men who are ready to special advantages claimed for the new engine are simplicity, small bulk, and easy | Grant when he said he "would fight it out handling. The machinery is described as on that line if it took all summer."

follows; The main body of the engine con-

tains six cylinders, arranged in a circle and

parallel with another, like the chambers of

a revolver. The pistons take the form of a

hollow plunger, one end terminating in a

blust cone, which beats continuously

against the periphecy of the disk. They

pressure upon the flat end only. Steam is

admitted successively to the six cylinders

constantly in action at different points of the

stroke, thereby imparting a uniform rolling

motion to the conical disk, which is stead-

ied at its center by a ball and socket joint,

and rolls upon the surface of the back

plate, which receives the full thrust of the

pustons and protects the ball and socket

from strain. There is a flat circular ring, a

valve which receives motion from an eccen-

tric carried by a shaft which passes through

the centre of the steam chest, which ring

slides steam tight but perfectly free be-

that prevents the steam pressure from act-

ing on the valve and makes its movements

nearly frictionless. The steam is admitted

to and fills an annular space in the steam

chest outside the circumference of the valve

ring, the eccentric motion of which alter-

nately opens and closes all the steam ports,

occessively admitting steam to the cylin-

valve ring, and thence through openings

are none of the keys, colters, and set

screws incidental to ordinary engines, and

as the gigantic strains are always in one

direction, either knocking or pounding is

impossible, while the various parts are all e and unconnected with one another, and

p nearly all cases where they touch the

contact is a rolling one. - Scientific Ameri-

COTTON-SEED OIL IN COCKERY. - The

aste, meaning the perception of food fla-

vors, is perhaps as arbitrary as any human

predilections. It seems in some fastidious

persons to equal in delicacy and prompt-

ness the finest of chemical tests, and when

influenced by the imagination, arguments

relating to hygienic properties and commer-

cial considerations have no effect. What-

ever, therefore, may be urged in favor of a

hew article of diet, in regard to economy

and mechanically fulfilling the require-

ments of the art of cooking, its adoption

jectionable flavor it may have. Except

pure sweet and sour, there are perhaps no

of avoiding the annoyances that attend the

use of the sputtering frying-pan with its penetrating and persistent odors, the ques-

tion of substituting cotton-seed oil, or any

other article, for lard in cooking will be an-

swered by each individual according to the

flavor of the cooked viands, for it is more

than probable that the oil and lard will dif-

These thoughts are prompted by the sen-

timent expressed by a New York Tribune

correspondent, who hails the prospect of a

substitute for " that product of the swine "

with hopeful expressions and a declaration

that "no one is afraid of vegetable oil." It

may be said also that, notwithstanding the

prejudice that has lately obtained against

pork products on account of trichine, no

one need be afraid of good lard, and that

every one will object to bad vegetable pro-

ducts, especially rancid of's, in cooking or

A RECENT scientific writer has undertaken

to show the erroneous view prevalent in re-

gard to the law of increase supposed to

govern underground temperature. This in-

crease has ususually been assumed to aver-

age ubout one degree C. to one hundred

rate of increase from the lowest strata ever

reached by man, would seem to show that

the temperature would be high enough to

melt almost every known substance. To

this method of reasoning, however, the

writer referred to raises the objection that it is very inaccurate and wholly unscientific

to apply a law to hundreds of miles that

has been deduced from observations rang-

ing between three thousand and four thest-

sand fust only; and that there are, too, va-

1 ous observations recorded, widely at va-

riance with any such law-two of these

the deepest over accomplished, one show-

ing no law at all, and the other exhibiting a

constantly diminished increase of tempera-

In a letter to M. Diamilla-Muller, M. Faye

suggests that in thunder-storms the force of

electricity is not merely charged air and icy

particles, whirling downward from upper

regions, but that electricity is developed in

BRAGGING.

It is natural for man to brag. And fre-

quently the less he has to brag over the

more bragging he will do. The most trif-

be introduced as " the man Harry of the

West booted." Men brag over things that

never happened, though they repeat it so

often that they come to believe it them. Recourses, January 17, 1881.

the act of giration.

as articles of food.

fer in their effects on the palate.

WANTED A GOYERNESS. A rare chance for a governess is offered Times. All that is wanted is that the candidate be "of good birth and education," shall "take the entire charge of a sweet little girl two years of age," Be "a useful and agreeable companion" to the sweet little girl's mamma, "elever with her needle, active and obliging, of good temper, amiable and unselfish and naturally fond of children, and be able to give the most undeniable references." For these trifles one hundred and twenty-five dollars a year, traveling expenses and washing are offered, with the additional inducement, that "conscientious and tender care of the little pet will be warmly appreciated."
